
Lighting Market & technical data

Posted by mr432 - 2008/02/14 09:13

I wonder if anyone can help me. I'm trying to find information about two lighting markets:

1. Billboard backlighting
2. Office lighting (including large new builds)

I need information on the potential market size for each as well as any technical data such as luminance required, efficiency required and efficacy required in each.

Any help would be gratefully appreciated!
